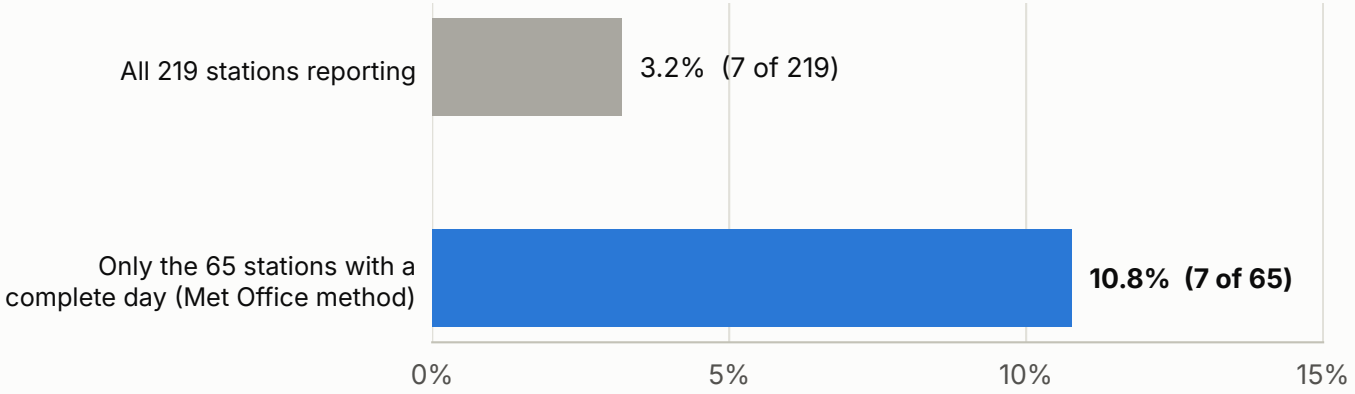
Christmas 2023: the same 7 snowy stations, two answers

Share of stations where snow or sleet was seen falling on 25 December 2023.
The Met Office published 11%.



Met Office rule (NCIC): an automatic station that reports snow in any hour is counted; one whose sensor misses any hour of a snow-free day is coded 9 and dropped. 154 of 219 stations were coded 9 in 2023 (up from 63 in 2022), due to sensor performance.

Data: Met Office MIDAS Open, UK daily weather observations (v202607), via CEDA. Open Government Licence.
